What is the most challenging component of the assignment?

During the period that complete clock project, I have several struggle with the memory mechanics of the alarm function. But I have resolve it recently so that is not a problem in this time. Another thing is presentation of the clock. Optimizing the design is complicated when I have finished some functions but the arrangement had a little bit inconstant.

My Progress

About the project, I have done it on Thursday, 15th Oct 2021:
